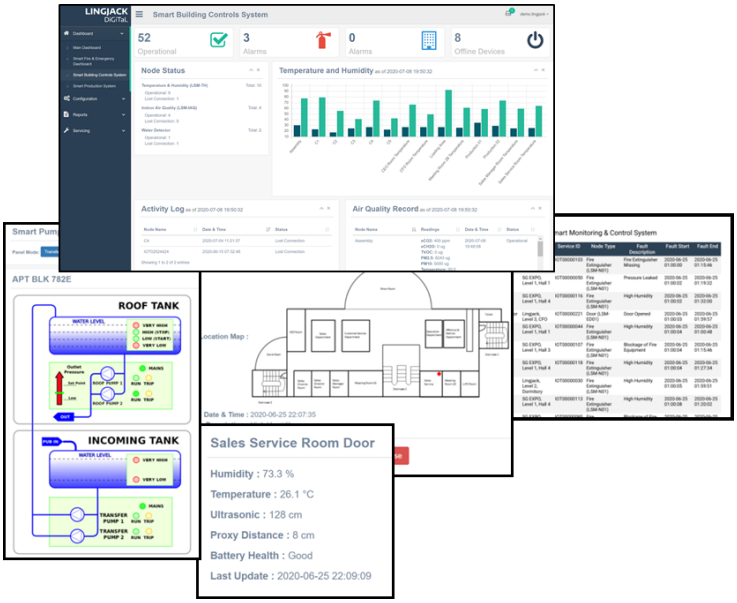
SMART DASHBOARD

AnyTime, AnyWhere, Live Monitoring & Control.



Introduction

The **SMART Dashboard** provides a **convenient and one-stop platform** to **monitor, control and manage** your equipment, rooms and critical assets remotely **AnyTime, AnyWhere**. **Improve response time and reduce inefficient activation of service personnel and resources.**

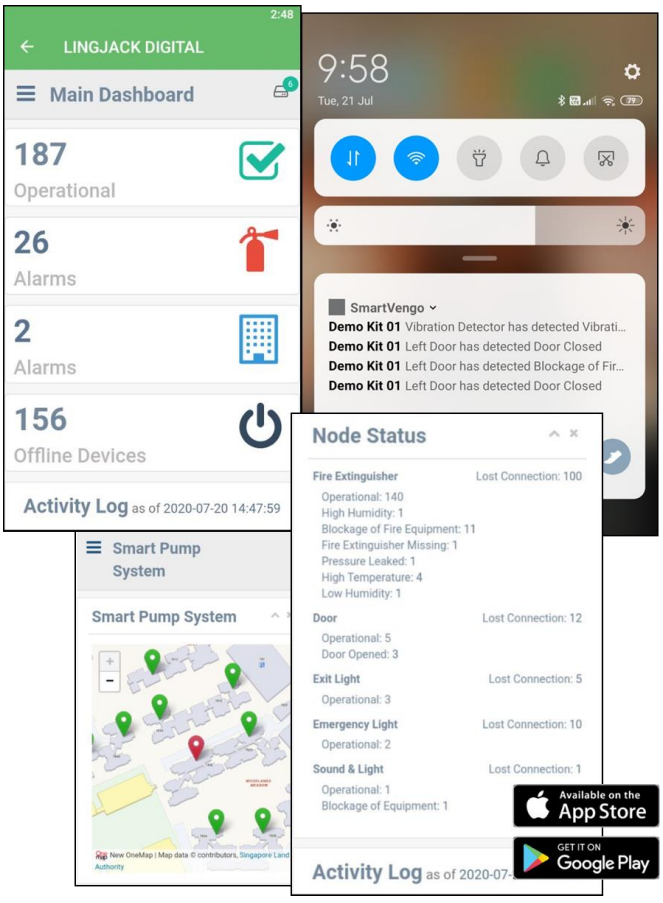
Accessible via Web or through an App. Available on Android (Play Store) and IOS (Apple Store). Automated Alerts for critical situations. Provides an **Interactive Display User Interface** using diagrams, charts, maps etc for an intuitive user experience.

With **Events and Alerts**, it allows operators to assess situational severity and plan a correct response. Diagnose situation with remote testing and instant results when available. In normal situation, allows **Scheduling of automatic tests** without being on-site.

Provides full **Service History** of intervention and maintenance activities. Enables **Report Generation** of tests and results which may be used to demonstrate Compliancy to testing Requirements by Regulatory Authorities.

Features

- **Secure access** with SHA 256 bits RSA encryption with password access control.
- **Remote, Live Monitoring and Control**
- **Interactive User Interface** to maximize User Experience & Operational Efficiency.
- Full **Activity Log** of all events.
- **Events and Alarms Management**. Operators can decide which events\alarms types to trigger for notification.
- Alerts via Email or App Notifications.
- **Remote Activation of Built-In-Tests.**
- **Maintenance Scheduling** of Service Activities and Tests.
- **Service History** and **Report Generation**.



About LINGJACK DiGiTaL

- ✓ Lingjack believes in Innovation. We believe that we can incorporate Digitalization and Technology in our operations and business. In 2017 we formed our own R&D team to conceptualize and develop technology products.
- ✓ Lingjack DiGiTaL was formed as an arm of Lingjack Engineering, with the objective to provide Total Solutions that leverage on Technology to deliver Value to our Customers.
- ✓ In 2019, we launched the first SMART monitoring system to enhance the Fire and Safety aspect in a facility in the world. We are also constantly working on AI, data analytics and robotics solutions to our Customers.
